Election/Restrictions

Applicant's election of claims 1-9 and 18-19 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

This application is in condition for allowance except for the presence of claims 10-17 to an invention non-elected without traverse. Accordingly, claims 10-17 been cancelled.

The title has been rewritten to read as follows:

Method for Cutting Mother Rod Lens and Lens Block for Supporting Mother Rod Lens

Claim 7, in order to correct a grammatical error, has be rewritten to read as follows:

7. The method according to claim 6, wherein the cutting step includes adjusting the perpendicularity of the first and second flat surface reflection bodies of the lens block and then inclining one of the two flat surface reflection bodies at a predetermined angle

relative to the predetermined ~~the~~ cutting surface to cut the lens block and the mother rod lenses.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the cited prior art fails to disclose or reasonably suggest a method of cutting a plurality of mother rod lenses by arranging a lens block, holding a plurality of rod lenses, at a predetermined position, emitting laser beams respectively towards a first and second side surfaces of the lens block, receiving reflection lights of the laser beams reflected by the first and second side surfaces with first and second screens respectively, adjusting the perpendicularity of the first side surface relative to a predetermined cutting surface of the cutter such that the reflection light of the first side surface hits a first base position on the first screen and adjusting the perpendicularity of the second side surface relative to the predetermined cutting surface such that the reflection light of the second side surface hits a second base position on the second screen. The cited prior art has cut a plurality of mother rod lenses by arranging them into a lens block, but does not disclose or reasonable suggest using laser beams, and reflection screens to adjust the perpendicularity of the side surfaces of the lens block relative to the cutting surface of a cutter as recited in the instant claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 1731

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carlos Lopez whose telephone number is 571.272.1193. The examiner can normally be reached on Mon.-Fri. 8am - 5pm.
